Composite door range guide

Don't compromise, go composite

We don't believe in compromising on quality. We've brought together materials to give you the very best in strength, easy maintenance, security, and weather resistance. Oh – and great looks as well.

Behind that rather scientific-sounding name, you'll find the latest technology and design in doors. When you're indoors you'll enjoy loads of style, strength and security.

Our composite door is thick – but it's also very smart. In fact it's 44mm thick (compare that to conventional PVC panel doors at 28mm). Its powerful too, its super-strong structural frame and up-to-the-minute hardware makes our composite door even more secure. Its glass reinforced plastic finish means you'll be secure in all weathers and enjoying great looks for years to come.

All the information in this book is provided for guidance only and is given in good faith, but without warranty or guarantee of any kind, whether implied or expressed.
